

Tyreman & Tyre Labelling

Tyreman is the next generation of real world automotive solutions.

Tyreman have been working hard to deliver what the market has been looking for.

Our solutions are fully interoperable with new features and latest technologies that are available not only now, but well into the future.

So if you are interested in improving your service and margins today, then the logical choice is Tyreman ...

EU Tyre Labelling:

In November 2012 new EU Tyre labelling regulations came into effect.

On 25 November 2009, the European Commission adopted the Regulation (EC) No 1222/2009 on the labelling of tyres (amended by Regulation 228/2011). It aims to provide end-users of vehicles with clear and relevant information about the quality of the tyre, and to guide them towards choosing a product which is more fuel efficient, has better wet braking and is less noisy.

Tyreman has it covered:

Tyreman has additional functionality in all our software packages to assist our customers with the compliance of these regulations.

From within the enquiry screen the ratings are easily available with the option of displaying an image of the label for a more visual presentation.

Relevant ratings are printed beneath the tyre stock line on customers receipts to provide clear evidence of company compliance to the regulations.

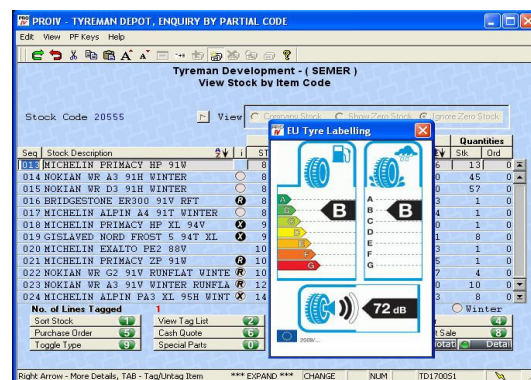

We can also offer full label printing to specification using dedicated Zebra label printers.

Tyre Label Information

The label indicates:

- the fuel efficiency class (letter A to G);
- the wet grip class (letter A to G);
- the external rolling noise measured value (in decibels).

Before the placement of an order the retailer must provide the consumer with the fuel efficiency class, wet grip class and external rolling noise class to allow the buyer to make an informed decision.

Contact information
