

Tyreman & Tyre Labelling

Tyreman is the next generation of real world automotive solutions.

Tyreman have been working hard to deliver what the market has been looking for.

Our solutions are fully interoperable with new features and latest technologies that are available not only now, but well into the future.

So if you are interested in improving your service and margins today, then the logical choice is Tyreman ...

EU Tyre Labelling:

In May 2021 EU Tyre labelling regulations were revised.

The European Commission adopted the Regulation (EU) No 2020/740 on the labelling of tyres. This added QR code, Snow grip & Ice Grip symbols. Labelling aims to provide end-users of vehicles with clear and relevant information about the quality of the tyre, and to guide them towards choosing a product which is suitable for their requirements.

Tyreman has it covered:

Tyreman has additional functionality in all our software packages to assist our customers with the compliance of these regulations.

Add ratings from EAN or IPC codes for easy updating.

From within the enquiry screen the ratings are easily available with the option of displaying an image of the label for a more visual presentation.

Relevant ratings can be printed beneath the tyre stock line on customers receipts to provide clear evidence of company compliance to the regulations.

We can also offer full label printing to specification using dedicated Zebra

Tyre Label Information

The label indicates:

- the fuel efficiency class (letter A to E);
- the wet grip class (letter A to E);
- the external rolling noise measured value (in decibels) + A or B;
- Snow symbol for Winter Tyres;
- Ice Symbol for Cold Conditions.

Before the placement of an order the retailer should provide the consumer with the information to allow the buyer to make an informed decision.
