

Tyreman continues its philosophy of technology integration with their latest release of a Commercial & Agricultural Breakdown System.

This technology allows breakdown jobs added to the office system to be transmitted to a fitters mobile device wherever they are.*

Introducing Tyreman

Tyreman is the next generation of real world automotive solutions.

Tyreman have been working hard to deliver what the market has been looking for.

Our solutions are fully interoperable with new features and latest technologies that are available not only now, but well into the future.

So if you are interested in improving your service and margins today, then the logical choice is ...

Tyreman

* subject to data signal

Job details entered at the office are available to the fitter on the device.

A familiar industry form design means a shallow learning curve for staff. The screen is completed in a similar fashion to the hand written form.

Captured data is stored and synchronised at regular intervals.

Images can be captured as evidence and signatures captured on screen.

This solution increases professionalism, reduces paperwork and saves time within the depot as job information is recorded only once.

Key benefits include:-

- Fast allocation of work
- Reduced volume of paperwork
- Streamlined job completion
- Highly portable
- Improved customer service
- Faster invoice creation
- Image & Signature capture

Tyreman continue to innovate using the latest technology.
