

Digital Pens

Tyreman

Tyreman is the next generation of real world automotive solutions.

Tyreman have been working hard to deliver what the market has been looking for.

Our solutions are fully interoperable with new features and latest technologies that are available not only now, but well into the future.

So if you are interested in improving your service and margins today, then the logical choice is ...

Tyreman

.....

Using technology to improve your business.

Tyreman digital pens are suitable for large or small businesses, this inexpensive handheld technology can help you boost sales, improve productivity, quality and service.

What is it? An electronic pen, that looks and works just like an ordinary ballpoint, but captures handwriting and drawings from paper forms and notes.

This simple handheld electronic data capture device offers a new way to record and communicate the information that is central to your business.

Forms can be designed for data entry with certain fields made compulsory so you will always obtain the information that is important to you and your customers. The captured data is transmitted via GPRS or from a docking station back at base and stored on a server for viewing, amendment after conversion to text, printing or just local storage.
